Pause and Rewind Live TV

One of the coolest features of the DVR is the real-time features. You can pause or rewind shows as you watch them- even if you are not technically “recording” the program. Just use the **Pause** button if you need to step away for a few minutes, then press **Play** when you return, or **Rewind** to review a scene. The program will automatically stop recording when it ends.

Tip: Press **Pause** when your program starts, then wait to start watching it five minutes after it starts by selecting the **Play** button. This will enable you to **Fast Forward** through all of the commercials, since you will be watching it five minutes behind schedule.

Important: The DVR is not intended to be a long-term storage device. Keep in mind that once you reach your space limitation maximum, older shows will be deleted automatically as new shows are recorded. To avoid losing old recording, that you would like to keep, it's best to clear out your queue every few days.

LOCK a Recording

This will insure that the recording is not deleted when the storage space becomes limited.

- Press **DVR**
- Use **▲** or **▼** to navigate to **Recordings**
- Press **OK**
- Use **▲** or **▼** to select the program you would like to modify
- Press **OK**
- Use **▲** or **▼** to navigate through to choose **LOCK**
- Press **OK**
- Press the **EXIT** button to exit DVR functions
